Respected Sir,

Greetings.

We are young entrepreneurs running an information technology company named CodeThrive Infotech.

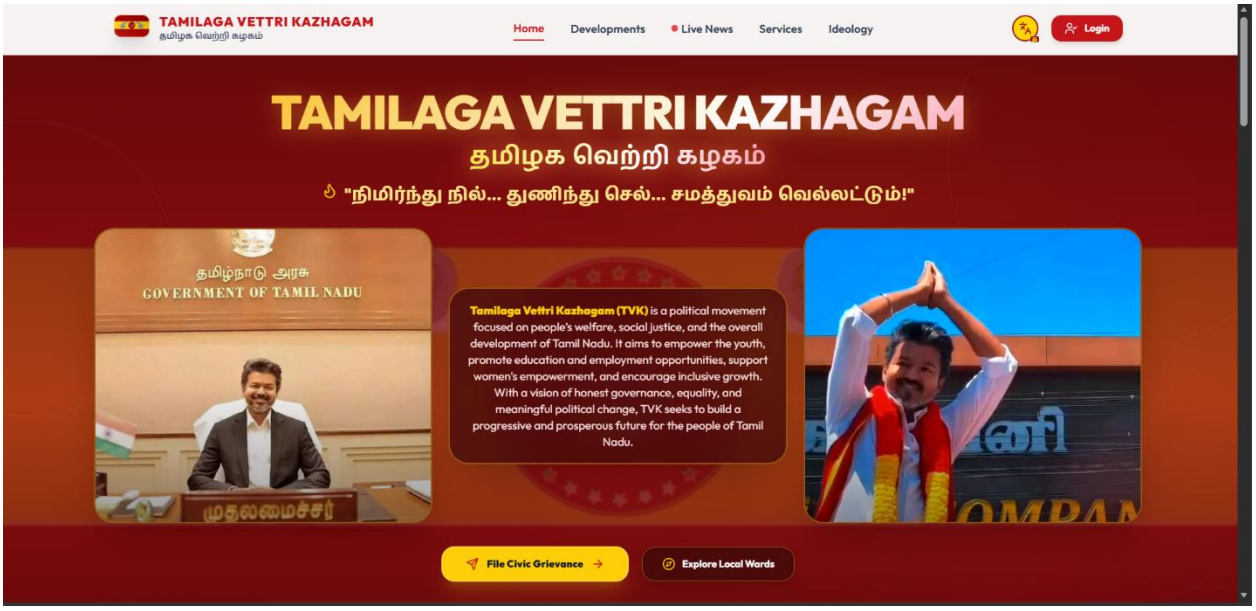

With the objective of further simplifying communication between the public and Members of the Legislative Assembly (MLA), we would like to introduce a digital platform project developed from our own idea.

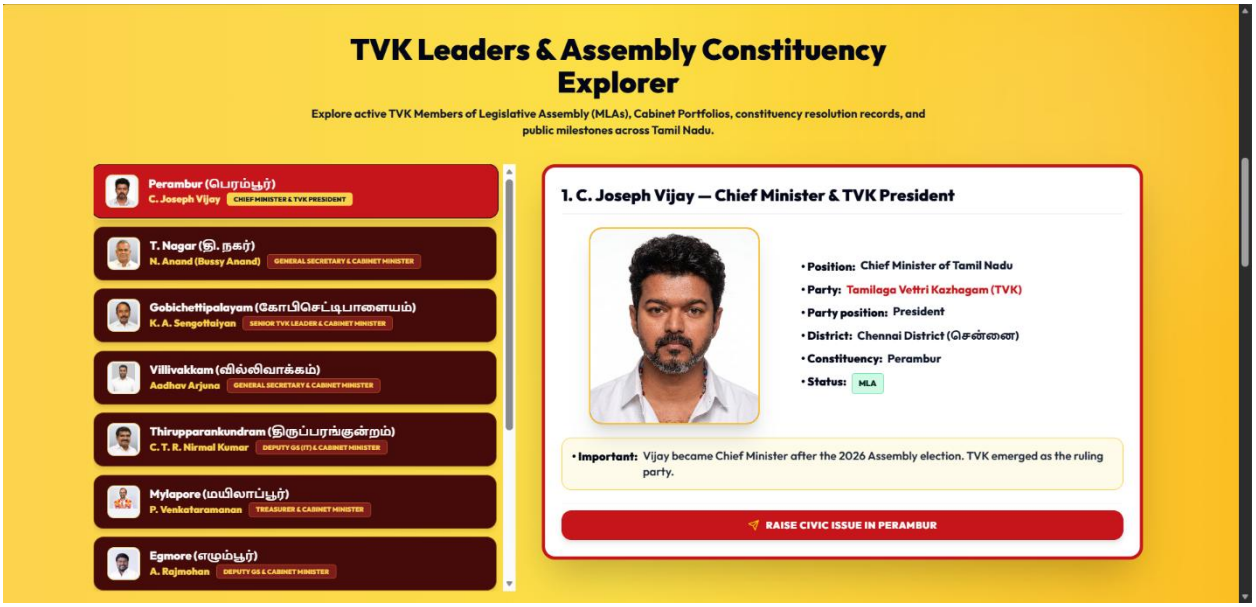

Currently, the public has the facility to register grievances through the Chief Minister's Special Cell (CM Cell). Similarly, if each Member of the Legislative Assembly (MLA) has a dedicated digital platform, the public will be able to easily register constituency-related grievances, and the MLAs will be able to manage them. In addition, the public will be able to transparently know about the public welfare activities and daily functions carried out by them.

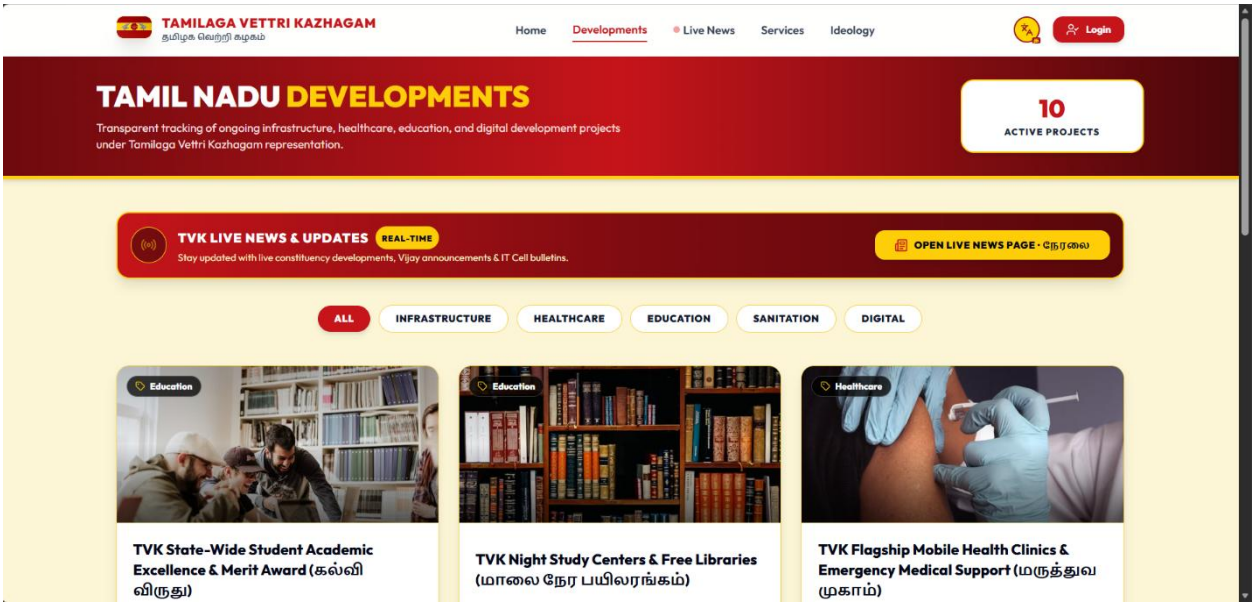

This project is entirely our own idea. We believe it will be useful to all people across Tamil Nadu, from villages to cities. Your guidance and support are very important to us in implementing this initiative.

We have attached the demo link of this project to this email.

Furthermore, we would also like to explain in person a new idea related to an SOS safety application aimed at improving women's safety.

We humbly request you to spare us a few minutes and provide us with an opportunity to meet you in person.

Thank you sir.

Yours respectfully,

CODETHRIVE INFOTECH
